Graphic Lp Optimizer Download

The Graphical Method (graphic solving) is an excellent alternative for the representation and solving of Linear Programming models that have two decision variables.. Graphical Method Exercises Solved in Linear Programming Exercise #1: A workshop has three (3) types of machines A, B and C; it can manufacture two (2) products 1 and 2, and all products have to go to each machine and each one goes in the same order; First to the machine A, then to B and then to C.. Within this context we will present a series of Linear Programming exercises that have been solved using the graphical method.. For this purpose there are computational tools that assist in applying the graphical model, like TORA, IORTutorial and.
